Based in Pakistan | Open to remote roles

PROFESSIONAL SUMMARY

Senior iOS Engineer with 5+ years of experience building and shipping production iOS applications across healthcare, IoT, fintech, e-commerce, and mobility. Experienced in SwiftUI, UIKit, Clean Architecture, and scalable mobile solutions, with a strong focus on performance, security, and delivering high-quality user experiences.

TECHNICAL SKILLS

Languages	Swift, Dart, Python, Objective-C
Frameworks & Apple SDKs	SwiftUI, UIKit, SwiftData, Core Data, AVFoundation, CoreBluetooth, HealthKit, Swift Charts, Core Location, MapKit, WidgetKit, StoreKit 2, CoreAnimation, EventKit, CloudKit, Cocoa Touch, TipKit
Concurrency & Reactive Programming	Swift Concurrency (async/await, Actors), Grand Central Dispatch (GCD), Operation Queues, RxSwift, Combine
Architecture & Design	Clean Architecture, VIPER, MVVM-C, MVVM, MVP, MVC, Dependency Injection
Networking	URLSession, Alamofire, RESTful APIs, GraphQL, WebSockets
Bluetooth & IoT	Bluetooth 5.0 / BLE, Lefu Smart Scale, Ring & Ankle devices, IoT sensor integration
Flutter	BLoC, Riverpod, GetIt DI, GoRouter, Dio, Freezed, Lottie, Material/Cupertino UI
Testing & Debugging	XCTest, TDD, Unit and UI Testing, Instruments, Memory & CPU Profiling, Leak Detection
Tools & CI/CD	Xcode, GitHub Actions, Fastlane, TestFlight, App Store Connect, Xcode Cloud, Jira
Security	Keychain, SSL Pinning, OWASP Mobile Top 10, Pen-Test Remediation, HIPAA patterns
Payments & Notifications	Apple Pay, Stripe, VR Payment, In-App Purchases (StoreKit), In-App Subscriptions, APNs, FCM

PROFESSIONAL EXPERIENCE

Senior iOS Engineer · Evolve Edge Technologies · Remote, Pakistan *Apr 2026 – Present*

Dry Revival — Wellness & Recovery App (iOS, App Store Live)

- **Ownership:** Lead end-to-end iOS development, architecting the app with SwiftUI and Clean Architecture while managing App Store releases and TestFlight distribution..
- **Hardware integration:** Integrate Lefu Smart Scale via Bluetooth to capture real-time body measurements and visualize progress through custom SwiftUI charts.
- **Monetization:** Implement StoreKit 2 subscriptions, server-side receipt validation, paywall flows, and purchase restoration to support recurring revenue.

OneAI Health — AI-Powered Healthcare App (iOS, Production)

- **Feature delivery:** Develop and enhance features for a redesigned HIPAA-compliant healthcare app, contributing across 35+ SwiftUI screens in collaboration with the tech lead.
- **Health charts:** Designed and built custom SwiftUI charts for steps, calories, sleep, heart rate, and other health metrics, delivering clear visual trends that improved data comprehension for patients and care teams.
- **Wearable integration:** Integrated wearable devices to capture biometric readings, bridging hardware sensor data with the app's health tracking and AI insight pipeline.
- **Security & compliance:** Apply secure mobile development practices, including Keychain, encrypted local storage, SSL pinning, GitHub Actions, and TestFlight-based CI/CD.

Software Engineer — iOS & Flutter · ILI.DIGITAL · Lahore, Pakistan (On-site) *Sep 2023 – Apr 2026*

KSC App — Event & Commerce Platform (Swift/UIKit)

- **Performance:** Reduced API requests from 7–8 to 1–2 through endpoint optimization and URLSession caching, improving screen load times by ~60% and eliminating timeout-related issues.
- **Minishop:** Built a one-tap MiniShop checkout by integrating the VR-Payment gateway with secure token handling, improving the purchase experience and reducing cart abandonment.
- **Offline & Engagement:** Implemented Core Data offline storage with background sync and integrated the Emarsys SDK for geolocation-based push notifications and deep linking, improving reliability and increasing user engagement by 35%.

- **Security hardening:** remediated SSL pinning gaps, token-handling vulnerabilities, and storage issues following external pen-test audit, achieving a clean security re-audit pass.

StayX — Gamification Learning App (Flutter)

- **Architecture:** designed state management system using BLoC, GetIt dependency injection, and Freezed sealed classes, producing predictable, fully unit-tested game and learning flows.
- **UX:** integrated Dio interceptors for resilient API handling, GoRouter for typed navigation, and Lottie animations, delivering a polished gamified experience with zero navigation regressions post-launch.
- **Team leadership:** delivered 30% of total mobile development in a 5-person cross-functional team; led weekly code reviews, enforced TDD standards, and mentored 2 junior engineers — both promoted within 6 months.

Software Engineer — iOS · Volocopter · Remote, Germany (Outsourced by ILI) *Sept 2023 – Feb 2024*

Volocopter — Urban Air Mobility Booking App (iOS)

- **Teamwork:** Collaborated with an international cross-functional team, including iOS engineers, backend developers, Product Owner, designers, and DevOps engineers, to deliver features for Volocopter's urban air mobility booking platform.
- **Agile:** Actively participated in sprint planning, backlog refinement, daily stand-ups, retrospectives, and quarterly planning sessions to align engineering efforts with product goals and continuously improve team processes.
- **Architecture:** Developed booking features using Swift, UIKit, SwiftUI, Clean Architecture, and modular SDKs, contributing to scalable and maintainable solutions while integrating RESTful APIs and Core Data.
- **Reusability:** Contributed to a shared UI component SDK used across multiple applications, promoting code reuse, consistent user experience, and faster feature development.
- **Quality:** Followed Test-Driven Development (TDD) practices, wrote XCTest unit and UI tests for critical booking flows, participated in code reviews, and helped maintain a reliable, production-ready codebase.

Software Engineer — iOS · BrainX Technologies · Lahore, Pakistan (On-site) *Nov 2021 – Aug 2023*

Go Power App — Real-Time IoT Solar Energy Monitor

- **IoT integration:** engineered real-time BLE 5.0 solar controller monitoring in Swift, optimizing GATT protocol communication to reduce data latency by ~35% and improve device sync reliability across intermittent connections.
- **UX performance:** redesigned core UI with memory management optimizations and async rendering, achieving a 20% improvement in user satisfaction scores per App Store feedback and QA benchmarks.

Driven Day — iOS Productivity Planner (UIKit / MVVM)

- **Delivered 50+ custom UIKit screens** under strict MVVM architecture with Google Calendar and iCloud sync integration, driving a 35% boost in cross-platform engagement and a measurable increase in 30-day retention.
- **Implemented** task creation, file uploads, and progress tracking with offline-first Core Data persistence, reducing churn among power users by ensuring full functionality without connectivity.

Additional Projects

- **Feedback SDK:** extended theming APIs with dynamic color support and improved developer documentation, increasing internal SDK adoption by 20% across 4 active projects.
- **SHCD (Vehicle Marketplace):** built image-based buy/sell listings with Stripe payment integration, improving checkout reliability and transaction success rate.
- **BH4H (Mental Health):** delivered a guided meditation app end-to-end with offline-first Core Data architecture using Swift & UIKit.
- **Baritastic (Objective-C):** implemented full Spanish localization and multi-screen UI enhancements, expanding accessible user base.

EDUCATION

Bachelor of Science in Computer Science *Jan 2017 – May 2021*

Sukkur IBA University, Pakistan · Algorithms · Data Structures · OS · AI · Data Science · Database Systems

AWARDS & RECOGNITION

- **OGDCL National Talent Hunt Scholar:** selected among top 100 of 5,000+ nationwide applicants; awarded fully funded bachelor's scholarship by Oil & Gas Development Company Limited.
- **Math Olympiad – Runner-Up (Sukkur IBA University):** led 4-member team to 2nd place finish.
- **iCOMET Conference Participant:** Attended the International Conference on Computing, Mathematics & Engineering Technologies.
