SUMMARY

iOS & Flutter Engineer with 4+ years shipping production mobile applications across healthcare, IoT, e-commerce, and urban mobility. Deep expertise in Swift, SwiftUI, UIKit, Xcode, and Flutter — Clean Architecture, AI/ML integration, security hardening, and full SDLC ownership from development through App Store Connect deployment in distributed Agile/Scrum teams.

TECHNICAL SKILLS

Languages:	Swift, Dart, Python, Objective-C	iOS / Apple SDK:	SwiftUI, UIKit, Auto Layout, Core Data, SwiftData, AVFoundation, CoreLocation, MapKit, CoreAnimation, WidgetKit, StoreKit
Concurrency:	Swift Concurrency (async/await, actors), Combine, RxSwift, GCD, Memory Management	Architecture:	Clean Architecture, MVVM-C, MVVM, MVC, Protocol-Oriented Programming, TDD
Flutter:	BLoC, Riverpod, GetIt (DI), GoRouter, Dio, Freezed, Provider, Platform Channels, Hive	AI / ML:	Core ML, Vision Framework, OpenAI API, on-device inference
Networking:	URLSession, Alamofire, RESTful APIs, GraphQL, WebSockets	Payments & IAP:	Apple Pay, Stripe, VR Payment, In-App Purchases, In-App Subscriptions, FCM, APNs
Security:	Keychain, SSL Pinning, Pen-Test Remediation, OWASP Mobile Top 10, Bluetooth 5.0	Tools & Deployment:	Xcode, Swift Package Manager (SPM), CocoaPods, App Store Connect, TestFlight, Git, GitHub Actions, Fastlane, CI/CD, Instruments, XCTest, Jira, Scrum

EXPERIENCE

Senior Software Engineer (iOS) Dec 2024 – Present
Evolve Edge · Remote

OneAI Health – AI-Powered Healthcare App (iOS, Production)

- Contributing to iOS development on a **live healthcare platform**, owning feature delivery for a full app redesign across 25+ screens using SwiftUI.
- Driving **AI-powered features** including LLM-backed health insights and smart data summaries, reducing time-to-insight for patients and care teams.
- Applying HIPAA-conscious patterns — Keychain storage, encrypted persistence, CI/CD via GitHub Actions and TestFlight — across all new and refactored modules.

Software Engineer (iOS & Flutter) Sep 2023 – Present
ILI.DIGITAL, Lahore, Pakistan · On-site

KSC App – Event & Commerce Platform (Swift/UIKit) — Full Revamp

- Led **complete UIKit redesign and codebase overhaul** using Xcode — rebuilt design system with Auto Layout from scratch, eliminated technical debt, and shipped one-tap MiniShop checkout with VR-Payment integration.
- Consolidated API calls from **7–8 round-trips to 1–2** and hardened security after pen-test audit — remediated token handling, SSL, and storage vulnerabilities for a clean re-audit.
- Integrated Emarsys SDK for **geolocation push + deep linking** and Core Data offline ticket access, contributing to a **35% increase in user engagement**.

StayX – Gamification Learning App (Flutter)

- Architected with **BLoC, GetIt DI, and Freezed sealed classes** for predictable, testable state management across game and learning flows.
- Integrated **Dio interceptors, GoRouter navigation, and Lottie animations** for a reliable and engaging gamified UX.
- Delivered **30% of mobile development** in a 5-person team; led code reviews, enforced TDD practices, and mentored junior engineers.

Volocopter – Urban Air Mobility Booking App (iOS) · Client Engagement

- Owned booking API integration and payment flows using **Clean Architecture with modular SDKs** and Core Data migrations.
- Built **reusable SwiftUI component library**, cut UI dev time ~15%; authored XCTest unit and UI tests for critical booking flows.

Software Engineer (iOS)

BrainX Technologies, Lahore, Pakistan · On-site

Nov 2021 – Aug 2023

Go Power App – Real-Time IoT Solar Energy Monitor

- Engineered **real-time BLE 5.0 solar controller monitoring** in Xcode, optimizing protocols to reduce latency and improve sync reliability.
- Redesigned core UI with memory management optimizations, achieving a **20% improvement in user satisfaction** per App Store feedback and QA benchmarks.

Driven Day – iOS Productivity Planner (UIKit / MVVM)

- Delivered **50+ custom UIKit screens** under strict MVVM architecture with Google Calendar and iCloud sync, driving a **35% boost in cross-platform engagement**.

Additional Projects

- **Feedback SDK**: Extended theming APIs and documentation, increasing internal adoption by **20%**.
- **SHCD (Vehicle Marketplace)**: Image-based listings with **Stripe payment integration**.
- **BH4H (Mental Health)**: Guided meditation app with **offline-first Core Data architecture**.
- **Baritastic (Objective-C)**: Full Spanish localization and multi-screen UI enhancements.

EDUCATION

Bachelor of Science in Computer Science

May 2021

Sukkur IBA University, Pakistan

Algorithms · Data Structures · Operating Systems · AI · Data Science · Database Systems

AWARDS & RECOGNITION

OGDCL National Talent Hunt Scholar — Selected among top 100 of 5,000+ applicants; awarded fully funded bachelor's scholarship by Oil & Gas Development Company Limited.

Math Olympiad – Runner-Up (Sukkur IBA University) — Led 4-member team to 2nd place; awarded an HP Core i7 laptop.
