Sham Kumar

Senior Mobile Developer — Android (Kotlin) & iOS (Swift)

(+92) 340-7336610 | ksham1999@gmail.com | LinkedIn | Portfolio | GitHub

Pakistan | Available for on-site roles in Islamabad

PROFESSIONAL SUMMARY

Senior Mobile Developer with 5+ years of professional experience designing, developing, testing, and releasing secure, high-performance native mobile applications for **Android and iOS** across healthcare, IoT, fintech, e-commerce, and mobility. Currently owns feature delivery on both platforms of a production healthcare product: **Kotlin, Jetpack Compose, MVVM/Clean Architecture, Coroutines/Flow, Retrofit/OkHttp, and Koin DI** on Android, and **Swift, SwiftUI, and UIKit** on iOS. Hands-on with device hardware integration (**Barcode/QR scanning, camera, face detection, GPS/location, Bluetooth/BLE**, wearables), REST API integration, offline data synchronization, OWASP-aligned secure development, automated testing, Firebase, and CI/CD-driven releases to Google Play and the App Store. Mentors junior developers and documents architecture, data flow, and release procedures.

TECHNICAL SKILLS

Android	Kotlin, Android SDK, Android Studio, Jetpack (Compose, Navigation, ViewModel, Lifecycle), Material 3, Coroutines/Flow, Retrofit/OkHttp, Koin DI (Hilt/Dagger concepts), kotlinx.serialization/Gson, CameraX, ML Kit, Health Connect, Java (maintenance)
iOS	Swift, SwiftUI, UIKit, Objective-C, Xcode, iOS SDK, Swift Concurrency, Combine, RxSwift, Core Data, SwiftData, AVFoundation, Vision, HealthKit, StoreKit 2, WidgetKit
Architecture	Clean Architecture, MVVM, MVVM-C, VIPER, MVP, modular SDKs, dependency injection, offline-first data layer, repository pattern
Device Integration	Barcode & QR scanning/generation, camera & image capture, face detection/verification, biometric authentication (Android BiometricPrompt, Face ID/Touch ID), GPS & location services, Google Maps/MapKit, Bluetooth/BLE (GATT), smart scales, wearables, IoT sensors
Data & Integration	REST APIs, JSON, GraphQL, WebSockets, OpenAPI, offline synchronization, caching, background sync, intermittent-connectivity handling, local storage
Testing & Quality	JUnit, MockK, Turbine, MockWebServer, Espresso, Compose UI Testing, XCTest/XCUITest, TDD, API, regression, performance & device compatibility testing
Debugging & Monitoring	Firebase Crashlytics, Sentry, Android Profiler, Instruments, Chucker, Timber; crash, ANR, memory-leak, and performance analysis
DevOps & Release	Git, GitHub, GitLab, Bitbucket, pull-request & code-review workflows, GitHub Actions, Fastlane, Xcode Cloud, Gradle, Firebase App Distribution, Google Play Console, TestFlight, App Store Connect, Jira, ClickUp
Security	OWASP Mobile Top 10, encryption, secure storage (Keychain, Android Keystore), SSL/certificate pinning, token handling, pen-test remediation, HIPAA patterns
Firebase & Payments	Firebase (FCM, Crashlytics, App Distribution), APNs, Stripe, Apple Pay, StoreKit 2, in-app subscriptions

PROFESSIONAL EXPERIENCE

Senior Mobile Engineer — Android & iOS · Evolve Edge Technologies · Remote, Pakistan *Apr 2026 – Present*

OneAI Health — AI-Powered Healthcare App (Android & iOS, Production)

- **Android ownership:** Develop, maintain, and optimize the Android app in Kotlin and Jetpack Compose on an MVVM/Clean Architecture codebase with Coroutines/Flow, Retrofit/OkHttp, and Koin DI, keeping feature behaviour in parity with the iOS app.
- **Cross-platform delivery:** Ship features across 35+ SwiftUI screens and their Compose counterparts, translating business and design requirements (Figma) into reliable mobile solutions with the tech lead, backend, QA, and design teams.
- **Device & sensor integration:** Integrated barcode/QR scanning (CameraX + ML Kit, AVFoundation), camera capture with on-device face detection (ML Kit, Vision), GPS/location (Fused Location Provider, Core Location), BLE wearables (CoreBluetooth, BLE GATT), and Health Connect/HealthKit health data.
- **Backend integration:** Integrated REST APIs from the OpenAPI contract with lenient JSON decoding, token refresh/rotation, and caching for intermittent connectivity; built custom charts for steps, sleep, heart rate, and HRV.
- **CI/CD & releases:** GitHub Actions pipelines build and test every PR, distribute dev builds through Firebase App Distribution, and promote releases through Google Play internal/beta/production tracks; iOS released via TestFlight and App Store Connect.

- **Quality & security:** Unit tests with JUnit, MockK, Turbine, and MockWebServer; crash and performance monitoring with Sentry; secure storage, encrypted data, and SSL pinning following OWASP Mobile and HIPAA practices.

Dry Revival — Wellness & Recovery App (iOS, App Store Live)

- **Ownership:** Lead end-to-end development with SwiftUI and Clean Architecture, managing App Store releases and TestFlight distribution.
- **Hardware integration:** Integrated the Lefu Smart Scale over Bluetooth LE to capture real-time body measurements and visualize progress in custom charts.
- **Monetization:** Implemented StoreKit 2 subscriptions, server-side receipt validation, paywall flows, and purchase restoration.

Software Engineer — Mobile (iOS & Flutter) · ILI.DIGITAL · Lahore, Pakistan (On-site) *Sep 2023 – Apr 2026*

KSC App — Event & Commerce Platform (Swift/UIKit)

- **Performance:** Reduced API requests per screen from 7–8 to 1–2 through endpoint optimization and response caching, improving load times by ~60% and eliminating timeout failures.
- **Offline sync & location:** Built Core Data offline storage with background synchronization, plus geolocation-based push notifications and deep linking (Emarsys SDK), increasing engagement by 35%.
- **Payments & security:** Delivered one-tap MiniShop checkout on the VR-Payment gateway with secure token handling; remediated SSL pinning, token-handling, and storage findings from an external pen-test to pass a clean re-audit.

StayX — Gamification Learning App (Flutter, Android & iOS)

- **Cross-platform architecture:** Designed BLoC state management with GetIt DI and Freezed, Dio interceptors for resilient API handling, and GoRouter navigation; shipped to Google Play and the App Store with zero navigation regressions post-launch.
- **Technical leadership:** Delivered 30% of mobile development in a 5-person team; led weekly code reviews, enforced TDD, and mentored 2 junior engineers, both promoted within 6 months.

Software Engineer — iOS · Volocopter · Remote, Germany (via ILI.DIGITAL) *Sep 2023 – Feb 2024*

Volocopter — Urban Air Mobility Booking App (iOS)

- **Architecture:** Built booking features in Swift, UIKit, and SwiftUI on Clean Architecture and modular SDKs, integrating REST APIs and Core Data; contributed to a shared UI component SDK used across multiple apps.
- **Quality & Agile:** Practised TDD with XCTest unit and UI tests for critical booking flows; worked in an international Scrum team with backend, DevOps, product, and design through code reviews and sprint ceremonies.

Software Engineer — iOS · BrainX Technologies · Lahore, Pakistan (On-site) *Nov 2021 – Aug 2023*

Go Power — Real-Time IoT Solar Energy Monitor

- **BLE integration:** Engineered real-time Bluetooth 5.0/BLE solar-controller monitoring, optimizing GATT communication to cut data latency by ~35% and improve sync reliability across intermittent connections.
- **Performance:** Profiled and fixed memory and rendering bottlenecks with Instruments, improving user satisfaction scores by 20%.

Driven Day — Productivity Planner (UIKit / MVVM)

- Delivered 50+ UIKit screens under MVVM with Google Calendar and iCloud sync, boosting cross-platform engagement by 35%; offline-first Core Data persistence kept every feature working without connectivity.

Additional Projects

- **Feedback SDK:** Extended theming APIs and wrote developer documentation, increasing internal SDK adoption by 20% across 4 projects.
- **SHCD (Vehicle Marketplace):** Camera/image-based buy-sell listings with Stripe payments. **BH4H:** offline-first meditation app. **Baritastic (Objective-C):** legacy-code maintenance and full Spanish localization.

DOCUMENTATION & COLLABORATION

- Write architecture notes, data-flow and API integration docs, CI/CD and release runbooks, and troubleshooting guides; work daily with backend developers, QA, UI/UX, business analysts, and project managers in Agile sprints.

EDUCATION

Bachelor of Science in Computer Science · Sukkur IBA University, Pakistan *Jan 2017 – May 2021*

AWARDS & RECOGNITION

- **OGDCL National Talent Hunt Scholar:** selected among the top 100 of 5,000+ applicants nationwide for a fully funded bachelor's scholarship.
- **Math Olympiad Runner-Up (Sukkur IBA University):** led a 4-member team to 2nd place. **iCOMET** conference participant.
